

zkyllos

Data storage and processing
system for canine
administrative procedures

Cost-effective decentralized solution for
dog owners, breeders, kennels and
regulators

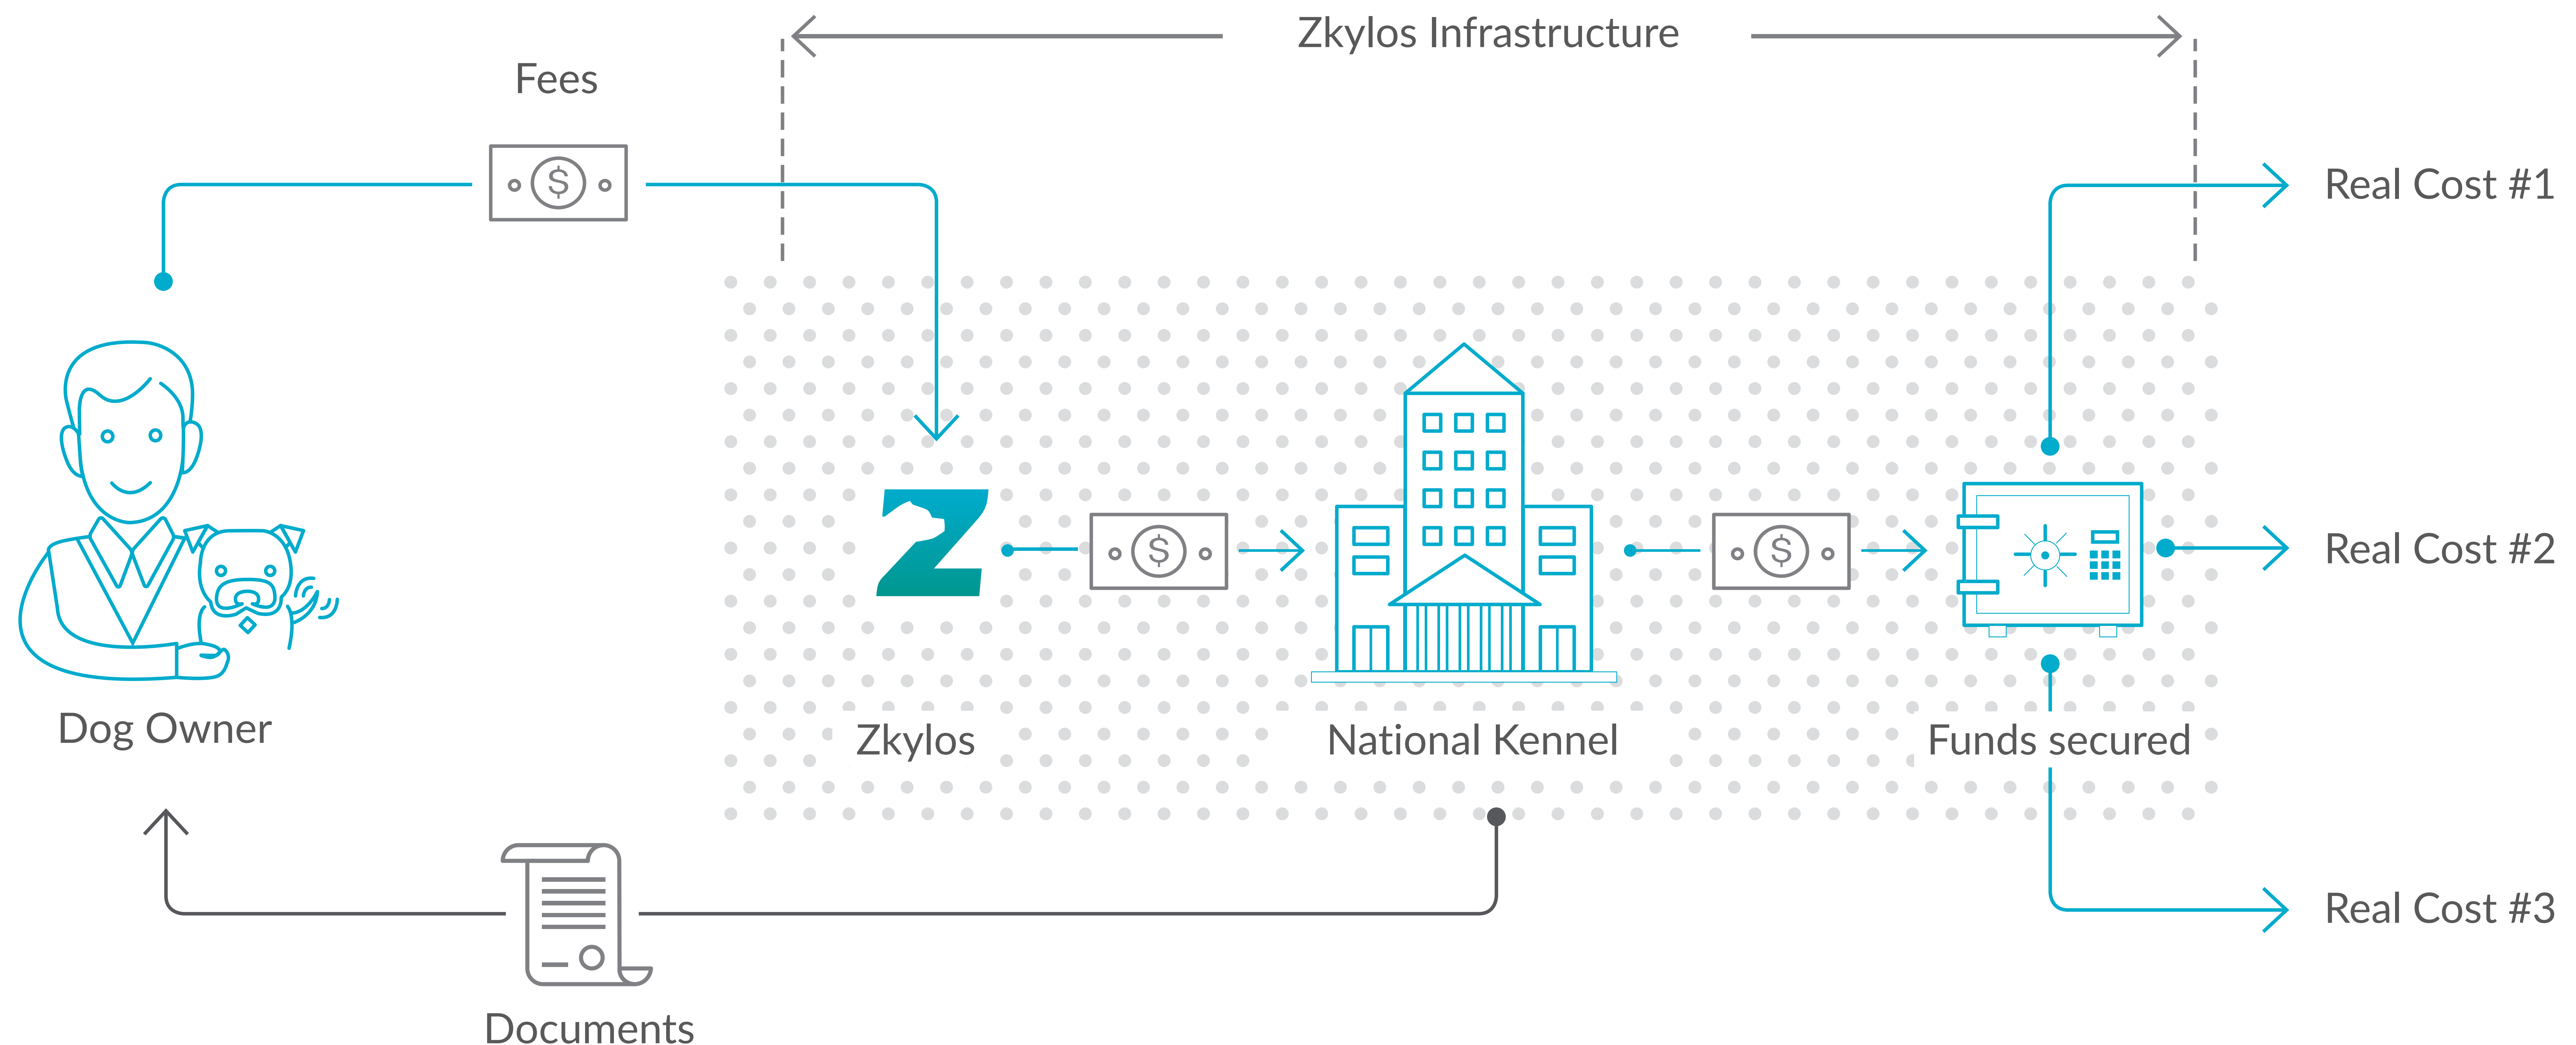

Problem

- Registration procedures and other administrative operations in the canine world are heavily regulated by kennels and national federations ("Kennels")
- Kennels all over the world **overcharge** dog owners for registration services due to using outdated infrastructure and their monopoly status
- Use of kennel proceeds **lacks transparency**, kennel users experience **lacks speed and convenience**

Solution

- Transparent global infrastructure solution based on blockchain technology
- Sets common global standard for canine registration operations
- Solves pain of dog owners, kennels and government institutions
- Unites all of the market participants in common ecosystem

Zkylos Advantages

Crossborder fullscale service combining database and processing solution

Dog owners

- Transparency
- Speed
- Convenience
- Cost-cutting

National Kennels

- Transparency
- Cost-cutting
- Easy to manage
- Data availability
- Simplicity

Governments

- Easy to tax
- Vaccination control
- Unification of standards

Database attributes include

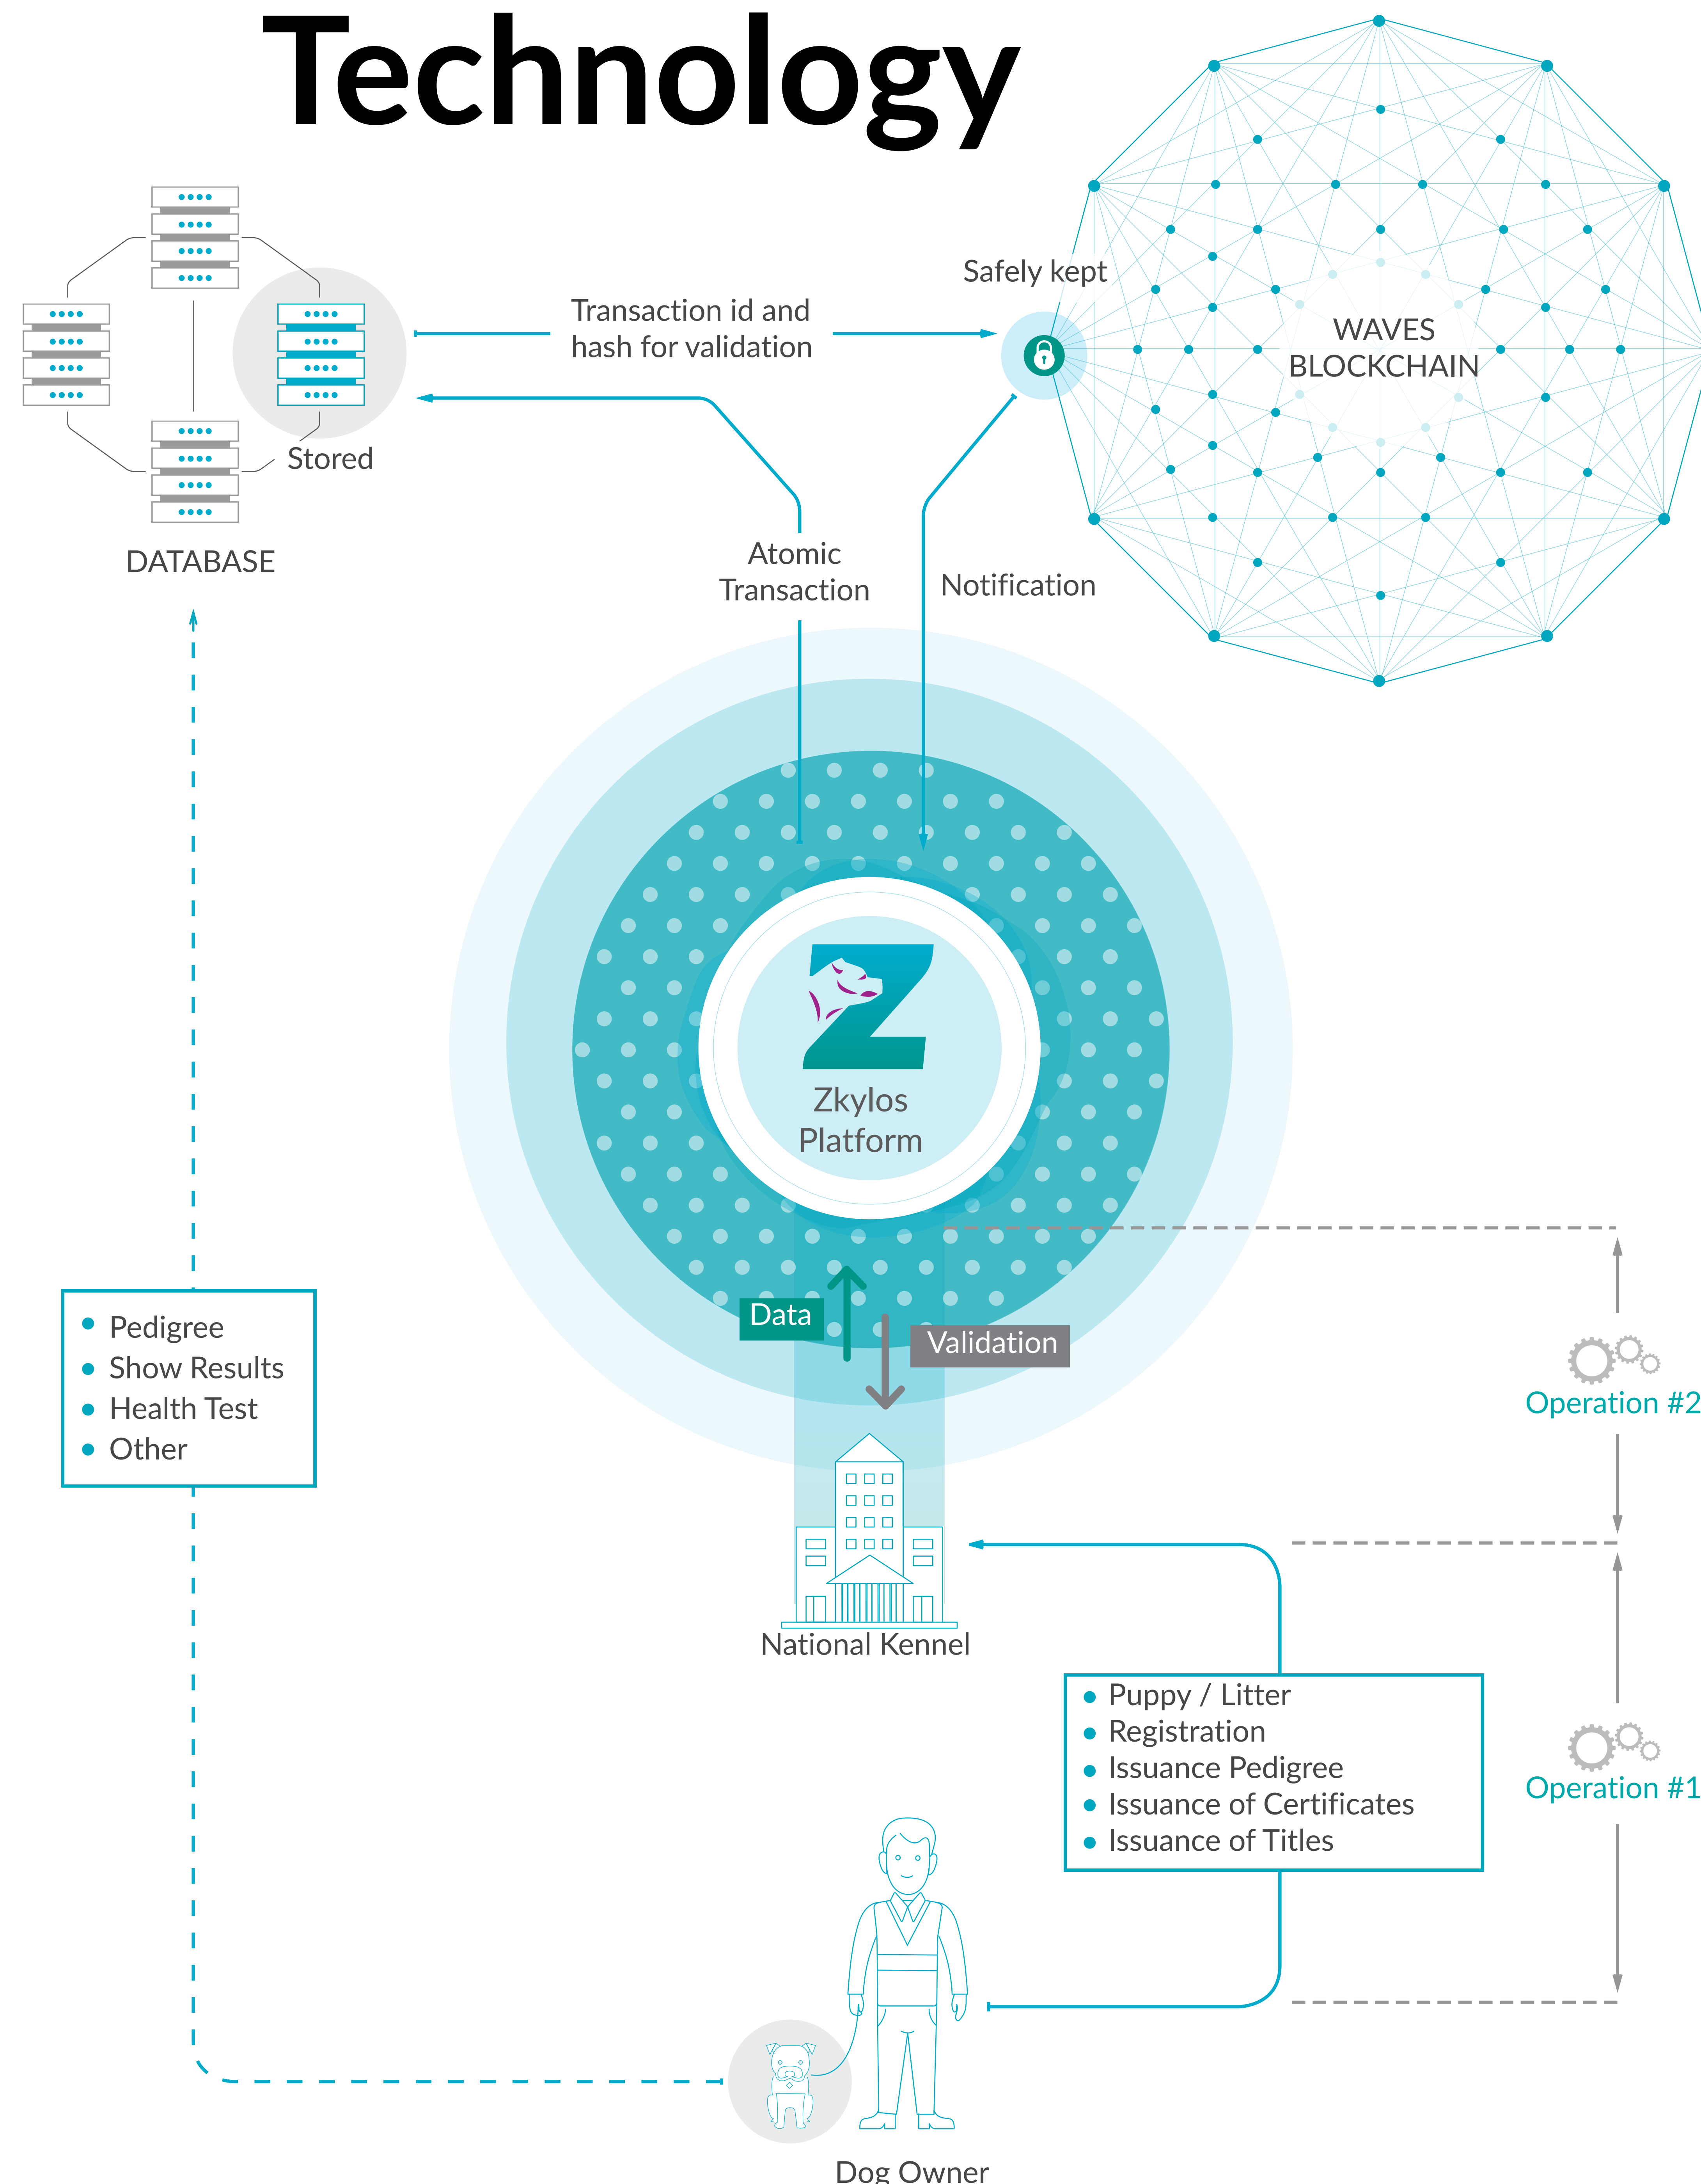

Exhaustive primary
species data

Health related data

Achievements

Pedigree data

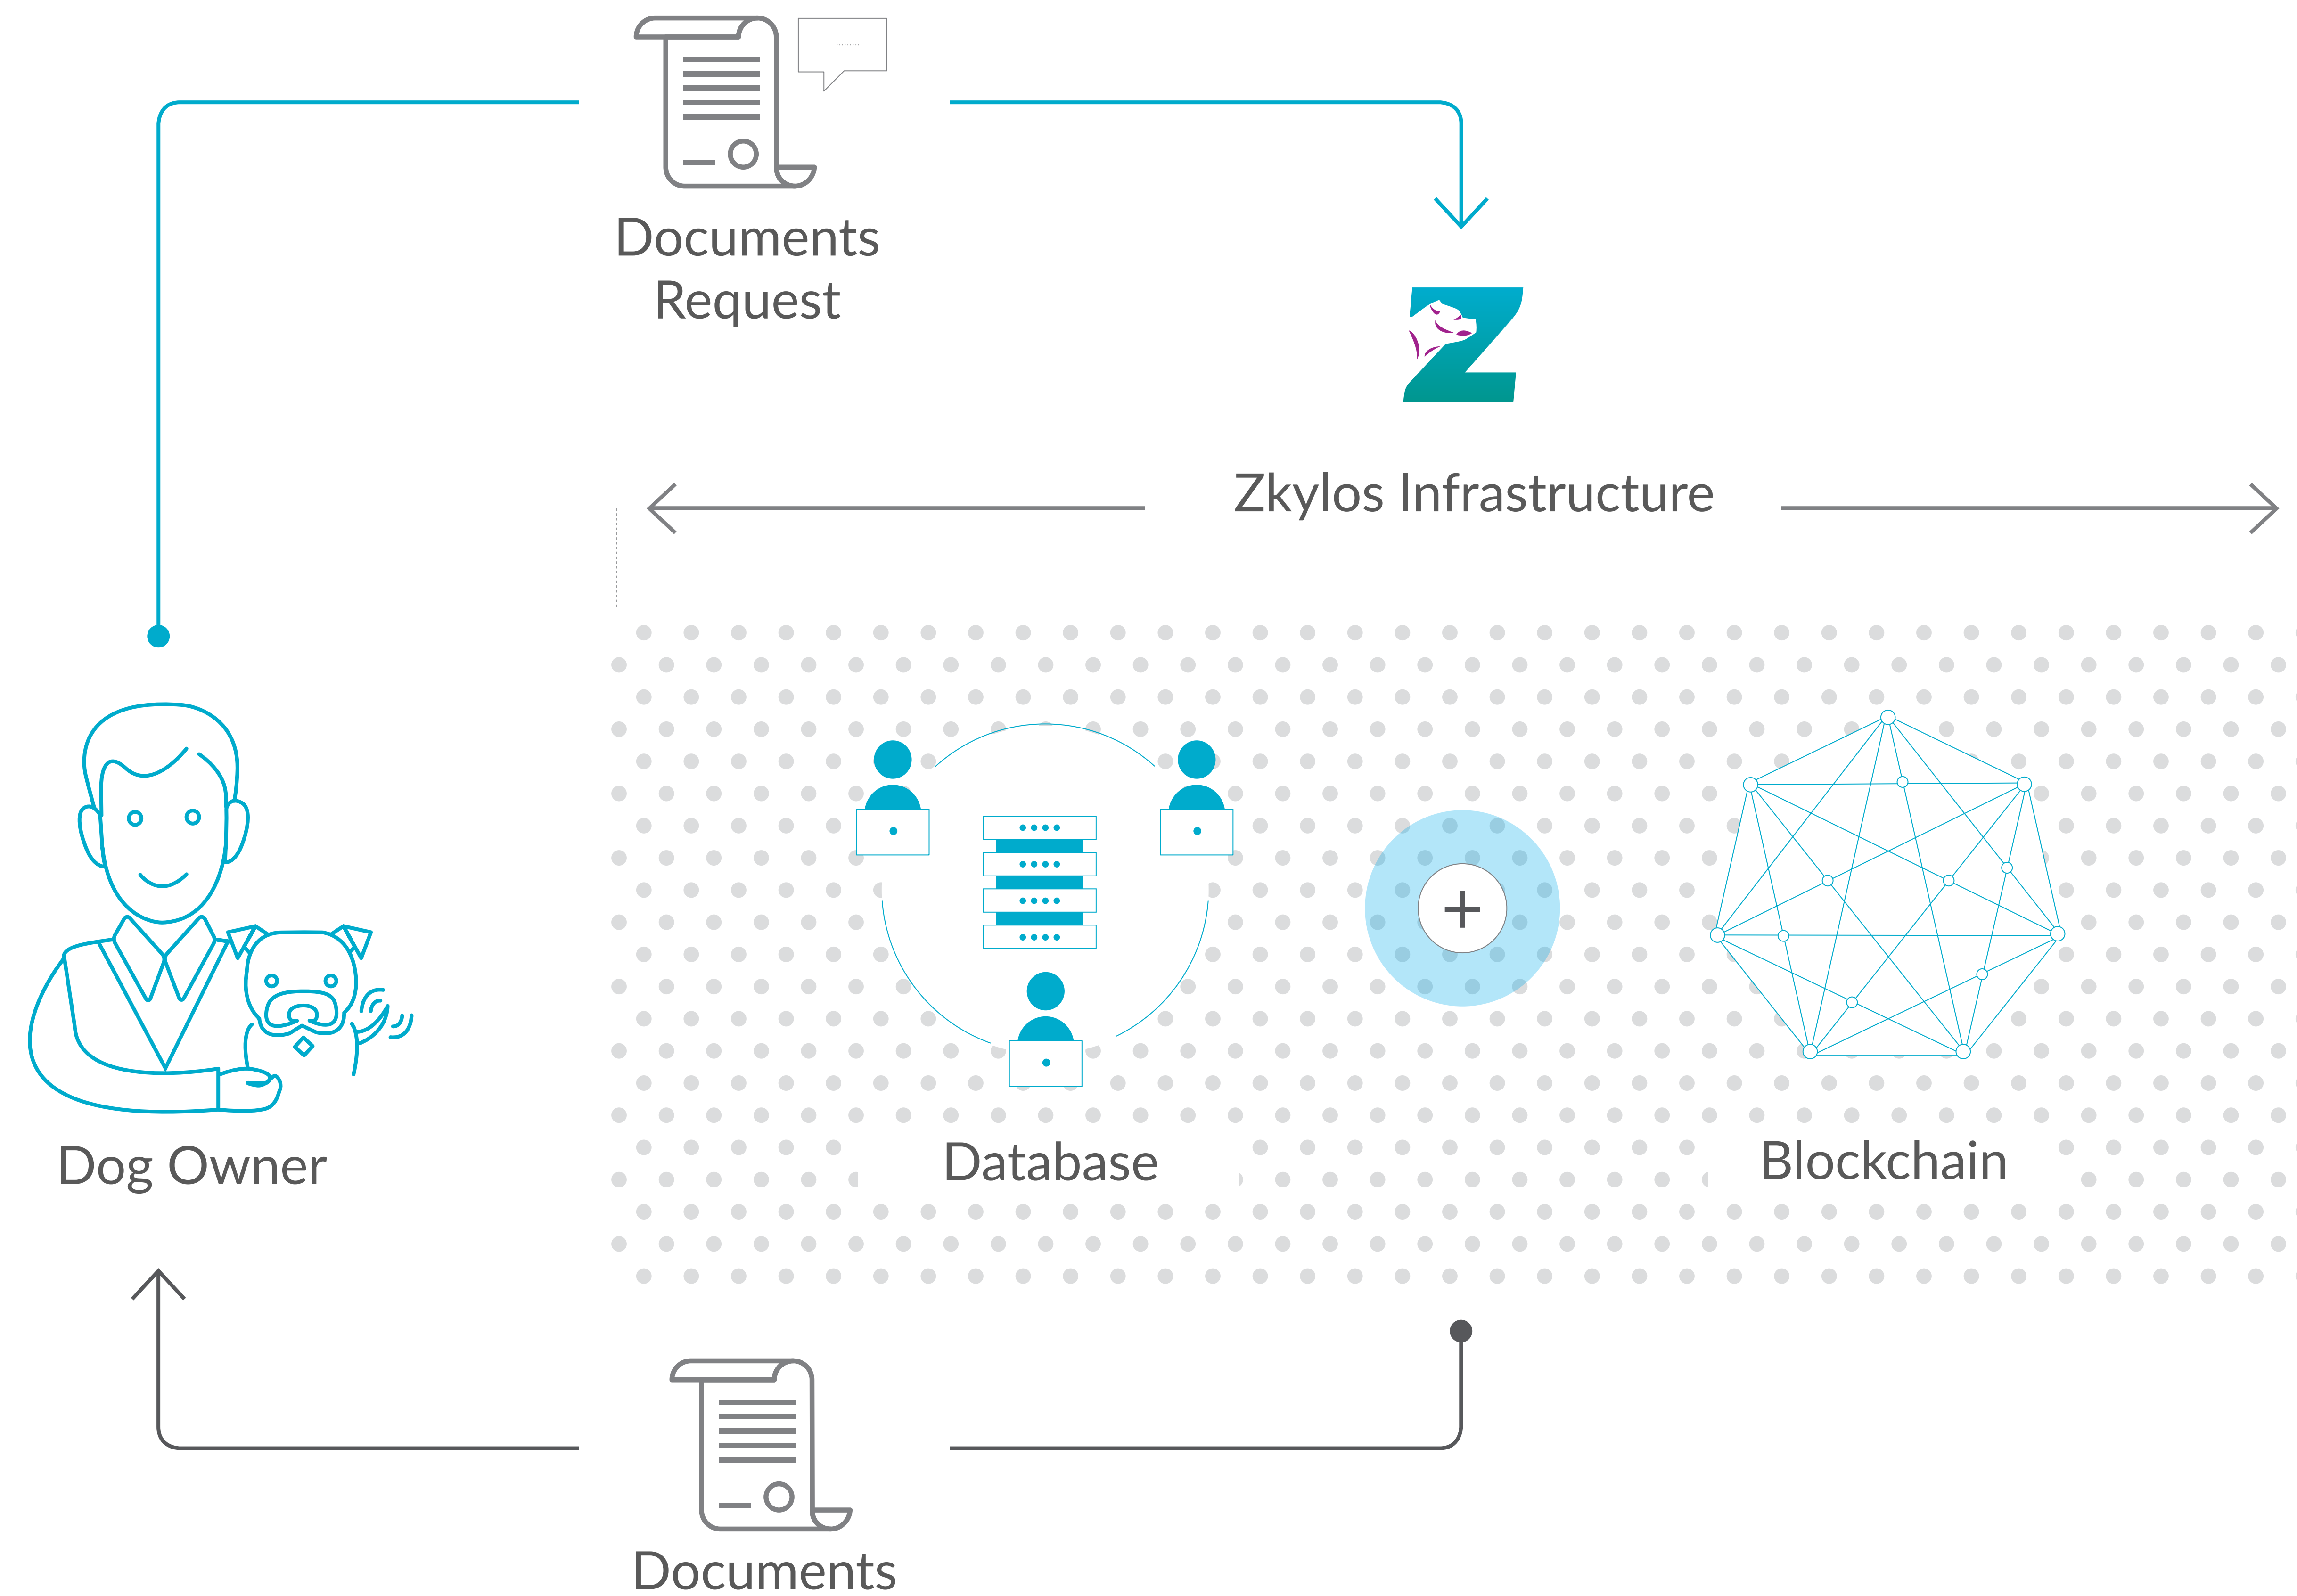

Technology

- Zkylos combines data storage with blockchain technology to achieve transparency
- Two tokens will be issued by Zkylos: utility (ZZZ) and support (ZKS) token
- Waves will be used as the blockchain platform for the ZZZ token only to keep the IDs and hashes of data stored in the database
- ZZZ utility token circulation will be restricted to Zkylos project. Tokens are not freely circulated while they play role of service unit
- ZKS tokens will be issued on Ethereum blockchain (ERC20) for fundraising and profit distribution purposes

Business model

- Kennels will enroll into license agreement to use Zkylos platform for canine administrative procedures
- We will take a fixed charge on each kennel transaction
- Kennels will benefit from the lower cost of administrative procedures

Zkylos platform can be scaled to other pet segments, in particular to cat market that is similarly-sized to canine

600M	Global pet dog population
9M	Annual puppies registrations
\$120M	Global puppy registration fees
\$200M	Puppy registration & pedigree issuance market

Fundraising

We are looking to raise equivalent of 5 000 000 USD

Token Distribution

Use of funds

Roadmap

Board of Executives

Elias Konstantinides
Founder & CEO

Serial entrepreneur.
Extensive experience in Risk Management and International Project Management.
Negotiations specialist with 5 years experience as Strategic Management consultant

Victor Grinchenko
Founder & CFO

PhD Economics.
Entrepreneur. 10+ years experience in finance: Deloitte, Philips.
Head of Budgeting in Sheremetyevo Airport, Moscow. Two years CFO in IT company.

Nikita Kurinniy
CTO

9 years of coding experience.
Python & Solidity expert.
Extensive experience in web services development.
Expertise in Swift, C# and other

Andrew Whitlaw
CMO

Over 25 years experience in cultural administration, fundraising and communications.
Executive in Hospitality Industry.
Broad expertise in International Marketing.
