

ID Tech

Decentralized Data platform

FOUNDER

Ethan Neuman

CEO

Entrepreneur, Ethan has a recognized expertise in mobile applications and management. He founded Flyers at age 21 in collaboration with Yoav during their studies, where he conducted a number of business angel fund raises.

Yoav Taieb

CTO

Developer Expert
Blockchain for almost 4 years, Yoav is one of the first developer interested in this technology. He founded 2 startups and ID Tech is above all the fruit of his knowledge. In September, Yoav alone developed the first alpha version of ID tech.

OVERVIEW

Sites and Applications are funded by advertising. In addition to being intrusive, the ad faces the laws of user protection and ad blocking, present on 90% of browsers which is over 950 million people, and as many losses. Several sites offer paid subscriptions or closed.

ID TECH

An authentication service that allows the tracking of data by the user. He may choose to sell them, thus earning remuneration for himself as well as the data provider sites. And all this decentralized in the blockchain.

With ID:

- Support millions of apps and websites by offering them the world of blockchain in order to provide a new means of authentication.
- Manage and protect all the data of web companies and users who trust us, decentralized in Blockchain.
- A new source of revenue for all developers as an alternative to advertising and totally unprecedented for the user.

Key Technology

Decentralization

The free protocol manages the data on blockchain. It includes an encryption system that allows maximum security and traceability in case of infringement.

Step-up Challenges

Prepare the system currently in Alpha version to accommodate a massive use as well as its integration to each platform.

DEPLOYMENT

Effortless Deployment

For user a design and friendly application.
For developer an easy multi platform SDK for new or exciting apps. All for free.

Modular and Expandable

Any enterprise can create his own service build using the ID protocol with his own marketplace for data brokers.
