

eDCaseMAN pitch deck

Efficient track, trace and cost saving eDiscovery/Disclosure management solution

Problem

- Companies don't know where their data is until it's too late
- **Companies** spend millions on over gathering data they don't even need!
- Case Management is mostly done in Excel and email
- Companies spend millions a year to review data
- No overall activity tracking is possible as communication is done in Email
- No real-time overview of active cases and their statuses
- No way of estimating delivery times and efforts

Companies can:

- Hold the data they need to hold for Legal Cases and know what to release.

- Be more efficient in scoping data collections by tracking investigations and deliveries.

- Now have an alternative to excel.

- Make all these decisions from your Tablet or Smartphone where ever you are.
